

GENETIC CERTIFICATE

Ms Birgit STOETTRUP

Oestervang 25 8380 Trige **DENMARK**

Name: Staugaard's Arabella

Capella

Breed: Bernese Mountain Dog

ID Number: 208 213 990 283 802 Pedigree Number: DK08733/2016

Gender: Female Birth date: 19/04/2016

Owner:

STOETTRUP Birgit 8380 Trige (DK)

Customer Nb: C76293

Sample Number: 532 603 (Authenticated)

Sample type: Blood sample Sample date: 24/05/2017 Request date: 02/06/2017

Sampler veterinarian : **KIRKETERP Christian**

8250 Egaa (DK)

Official number: 4020

File Nu.: 132 849 Animal Number: 155 593 Result code: 267389

Histiocytic Sarcoma (Test SH)

Result: Index B

Interpretation: Neutral index - not predictive of higher or lower risk of developing Histiocytic Sarcoma.

> This genetic test should be just one of the many selection criteria. It is important within a breeding population to give priority to individuals with the best index but is also of the utmost importance when selecting breeding pairs that sufficient genetic diversity is maintained in the breed.

Result established on 16/06/2017 Certificate issued on 16/06/2017

Cécile Kaerle Genetic Analyst

Explanation

This genetic test for Histiocytic Sarcoma is based on 9 genetic markers (Panel SH0912) identified from scientific research on Histiocytic Sarcoma on Bernese Mountain Dogs carried out by the Canine Genetics Team of the CNRS of Rennes, France. The methods used to calculate the genetic index were based on a population of 1081 European dogs, mainly from France. The test for Histiocytic Sarcoma has three possible results expressed as an index: index A, the individual tested has a four times lower risk of developing Histiocytic Sarcoma; index B means neutral index; index C, the individual tested has a four times higher risk of developing Histiocytic Sarcoma. This genetic test is simply a probability test, and this must be clearly accepted by the user.

This genetic test is designed solely to be a tool to help breeders in their breeding decisions. As a probability test, the test SH is subject to error and should not therefore be used, under no circumstances, as a commercial or advertising point by breeders.

The ANTAGENE laboratory will provide the necessary state-of-the-art technology to guarantee the reliability of its genetic test.
