

GENETIC CERTIFICATE

Mrs Tina BOISEN

Nøkkerosevej 11 8240 Risskov DENMARK

Name : Berner-Emmas Æ Jerre Sidney

Specie : Dog Breed : Bernese Mountain Dog

ID Number : 208 250 000 124 071 Pedigree Number : DK00213/2019

Gender : Male Birth date : 29/11/2018

Owner : BOISEN Tina 8240 Risskov (DK) Customer Nb : C131411 Sample Number : **716 092** Sample type : Blood sample Sample date : 11/12/2020 Request date : 21/12/2020

Sample realized by : **ZACHO Christina** (Veterinarian) 8520 Lystrup (DK) Official Nb : **6272** Authenticated sample

File Nu. : 188 517 Animal Number : 235 560 Result code : 445576

Histiocytic Sarcoma (Test SH)

Result : Index B

Result established on 29/12/2020

Certificate issued on 29/12/2020

Interpretation : Neutral index - not predictive of higher or lower risk of developing Histiocytic Sarcoma.

This genetic test should be just one of the many selection criteria. It is important within a breeding population to give priority to individuals with the best index but is also of the utmost importance when selecting breeding pairs that sufficient genetic diversity is maintained in the breed.

Explanation

This genetic test for Histiocytic Sarcoma is based on 9 genetic markers (Panel SH0912) identified from scientific research on Histiocytic Sarcoma on Bernese Mountain Dogs carried out by the Canine Genetics Team of the CNRS of Rennes, France. The methods used to calculate the genetic index were based on a population of 1081 European dogs, mainly from France. The test for Histiocytic Sarcoma has three possible results expressed as an index: index A, the individual tested has a four times lower risk of developing Histiocytic Sarcoma ; index B means neutral index ; index C, the individual tested has a four times higher risk of developing Histiocytic Sarcoma. This genetic test is simply a probability test, and this must be clearly accepted by the user.

The ANTAGENE laboratory will provide the necessary state-of-the-art technology to guarantee the reliability of its genetic test.

ANTAGENE - RESEARCH AND ANALYSIS LABORATORY IN ANIMAL GENOMICS 6 allée du Levant - CS 60001 - 69890 La Tour de Salvagny - France - Tél: +33 (0)4 37 49 90 03 - Fax: +33 (0)4 37 49 04 89 www.antagene.com - contact@antagene.com

This genetic test is designed solely to be a tool to help breeders in their breeding decisions. As a probability test, the test SH is subject to error and should not therefore be used, under no circumstances, as a commercial or advertising point by breeders.
